

## PRESS RELEASE

### **Omnitronics continues to make Great Advances in P25 Technology**

**11<sup>th</sup> December, 2013, Perth, Western Australia**

Omnitronics, a world leader in mission critical dispatch and radio management systems, has continued to reach new levels of excellence in offering P25 radio network and management solutions to customers.

The DRG100 P25 DFSI interface has now been successfully tested with 3 different radios including the Tait TB9100, Spectra MX800 and RF Technology Eclipse 2.

These tests have shown the capability of the DRG100 to transmit voice and data back to Omnitronics' DX-Altus and RediTALK dispatch solutions. This not only enables greater dispatch capabilities but also interoperability across protocols including the capability for phased migration from Analog to P25.

Emergency and Blast Tones have also successfully been implemented across a P25 network for Anglo American's Capcoal coal mining Operation in the Queensland Bowen Basin using a DX-Altus Digital Radio Management System. Using the tone encoding technology that forms part of the P25 Phase-II standard, Omnitronics have been able to overcome difficulties typically associated with sending tones over P25 in digital mode. The resultant tone signal can be reproduced by most P25 radios.

We are very pleased to be expanding our compatibility with more P25 vendors and to be enhancing the functionality available to end users. By conducting comprehensive testing and working closely with customers, Omnitronics continues to show commitment to offering robust and interoperable solutions, said John Florenca (CEO).

ENDS

#### **About Omnitronics**

Omnitronics is a world leader in the design, manufacture and supply of mission critical communication systems.

Specializing in Digital Radio Management, Dispatch, Interoperability and Radio over IP, our products and solutions operate 24/7 in the control centres and radio infrastructures of some of the world's most vital organizations.

Operating for over 30 years, Omnitronics has an international network of distributors and resellers spanning the USA, UK, Europe, Australia and Asia.
