

PRESS RELEASE

OMNITRONICS CONSOLES INTERFACE WITH SIMOCO P25

4th December 2014, Perth, Western Australia

Omnitronics, a world leader in mission critical dispatch and radio management systems, has enhanced its dispatch solutions by announcing support for a Simoco P25 simulcast conventional radio network.

Testing was carried-out using a RediTALK soft console and a DFSI compliant gateway. The DRG100-P25 gateway enables multiple dispatch users to share the P25 channel. The gateway is also compatible with the DX-Altus Digital Radio Management System.

The DRG100-P25 Gateway is a building block in the Omnitronics dispatch architecture. It enables a DFSI compliant radio to be controlled and monitored by multiple users. The device supports all normal P25 features including channel change, group calls, individual calls and ALL call. As part of the dispatch architecture, the DRG100-P25 enables customers to interoperate P25 channels with channels from other systems or technologies.

Simoco P25 Product Manager, Glenn Sneddon commented, "We are pleased to have officially completed interoperability testing, with Omnitronics a quality console solutions provider. Now that we have completed these tests, we can offer the Omnitronics dispatcher solution as part of our growing range of Simoco P25 standards based applications."

John Florenca, Omnitronics (CEO) commented, "Omnitronics and Simoco have partnered together on a number of projects over the years. This latest collaboration shows our commitment to offer our customers greater choice and flexibility for communications solutions".

ENDS

About Omnitronics

Omnitronics is a world leader in the design, manufacture and supply of mission critical communication systems.

Specializing in Digital Radio Management, Dispatch, Interoperability and Radio over IP, our products and solutions operate 24/7 in the control centres and radio infrastructures of some of the world's most vital organizations.

Operating for over 30 years, Omnitronics has an international network of distributors and resellers spanning the USA, UK, Europe, Australia and Asia.
